

# Chimney Exhaust fan Technical Data

Exhaust fan is used for combustion gases forcing through the chimney from the boiler working in wood gasification process, in temperature up to 380°C.

They are adapted to work in horizontal or vertical position.

Exhaust fan are to be mounted into chimney flue.

PARAMETERS	MEASURE UNITS	FAN TYPE WKO		
		180	200	210
Motor rotation speed	rot/min	2760	2760	2760
Motor power	W	19	19	30
Exhaust diameter	mm	180	200	210
Rotor outlet diameter	mm	175	175	175
Fan weight (without motor)	kg	14	14	15
Fan weight (with motor)	kg	16,5	16,5	18
